# What Is the Accumulation/ Distribution Indicator (A/D)?

The **accumulation/distribution indicator** (A/D) is a cumulative indicator that uses volume and price to assess whether a stock is being accumulated or distributed.

The A/D is one tool that can be used to **assess strength or weakness** within a trend, and potentially spot forthcoming reversals.

# What Does the A/D Tell You?

- The A/D seeks to identify **divergences** between the stock price and the volume flow.
- A rising A/D confirms a strongly **rising** price, while a falling A/D and price, indicates a **distribution**, then prices are likely to continue to **decline**.

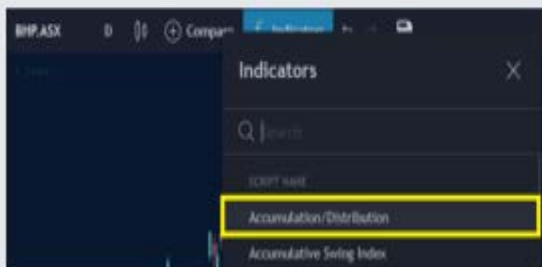

# How to Add the A/D Indicator

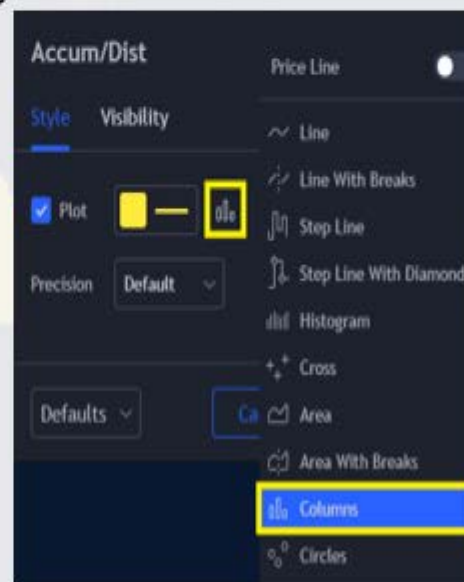

1. In the chart, click on **Indicators**

2. Search and select **Accumulation/Distribution**

3. To modify, click on the **Cog**, to select the AD type and values
